WHAT SHOULD I ALREADY KNOW?

– What I should already know:
- how to select and set brushes and colours
- how to create artwork on iPads
- how to use the undo function if I make a mistake
- how to paint on top of photographs
- how to use multiple layers in my art

STICK KNOWLEDGE

- Ipads and tablet devices often have a camera app to take photos.
- Photos can be edited on apps to make them look different.
- Ipads can add effects to change the look of images.

VOCABULARY

|	
Adjustment	operation performed on the colour values of all or some pixels in an image, for example increasing or decreasing brightness, contrast or colour saturation
Camera roll	dedicated directory on iPads in which all images are stored
Crop	to reduce the size of an image to a smaller, rectangular region, e.g. to remove large areas of uninteresting background
Filter	standard set of adjustments applied to all the pixels in an image, e.g. 'dramatic' or 'silvertone'
JPEG	common, 'lossy' format for image compression, in which the data for some inconspicuous detail in an image is discarded to allow more images to be stored in available memory
Pixel	picture element – one of the small, square dots that makes up a digital image

Key person: Nicholas Wulstan Park, CBE, RDI, is a British animator, director, producer and writer who created Wallace and Gromit, Creature Comforts, Chicken Run and Shaun the Sheep
