

Biology

Animals Including Humans

Year 1/2 - Spring

What should I already know?

Different animals live in different places.

I can name some woodland animals, pets and nocturnal animals.

I can tell you the names of some animal babies.

What will I learn?

There are different groups of animals. These groups are fish, amphibians, reptiles, birds and mammals, including pets.

Animals have different diets. These can be grouped into carnivores, herbivores and omnivores.

Animals have offspring which grow into adults.

Research

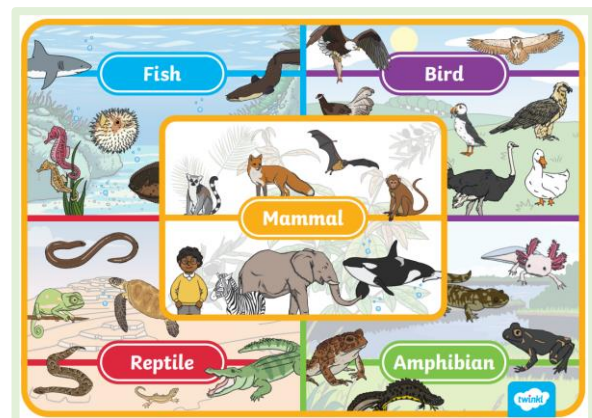

Tier 3 Vocabulary

Herbivore

Carnivore

Omnivore

Offspring

Working Scientifically Skills

How will I be a scientist?

Plan

I will learn about different groups of animals

I will research an animal to find out about its offspring

Do

I will identify groups of animals and sort them according to these groups

I will find similarities and differences between animals and their offspring

Record

I will record using a simple tally how many animals I have placed into a certain group

Review

I will review the groups of animals and identify some key features for each group
